2019

The 19th International Conference
on Micro and Nanotechnology
for Power Generation
and Energy Conversion Applications

Goals of the Conference

The PowerMEMS conference provides an excellent opportunity to bring together world scientists and engineers from academia, research institutes and companies to present and discuss the latest results in the general fields of miniaturized devices and systems for power generation and energy conversion in micro and nano scales. We warmly accept wide range of topics, from basic principles, materials and fabrication ending on applications and markets in all energy domains including, but not limited to: electrical, mechanical, chemical, thermal, magnetic, electrostatic, ferroelectric, optical, nuclear, and fluidic. The conference goals are to stimulate interaction and knowledge exchange between the delegates in a friendly atmosphere.
